

AI Group Training Hall — Client User Guide

A simple, step-by-step guide to running an **AI-led group training session**. No human trainer is required during the session — the AI avatar presents the training, answers questions, takes attendance, and ends the session automatically at the scheduled time.

This guide is for three audiences:

- **Admin / Trainer** — who creates and schedules the training.
- **Hall Operator** — who sets up the big screen in the room.
- **Trainee** — who attends from their phone.

1. What this system does (in one picture)

Key idea: The **big screen is the classroom** (AI trainer + slides + voice).

The **phone is the companion** (follow along, raise hand, ask questions).

2. Admin / Trainer Guide

2.1 Create a Group Training

- • Max Speak (secs) (e.g. 90)
- • Max Questions / Trainee (e.g. 3)
-
- ■ Add slides / content (same as normal training)
- ■ Pick the AI Avatar & Voice
- ■ Submit for review ■ ■ Approve

★ **Always set a Start Time.** *This is what makes the session start automatically. If you leave End Time blank, the system calculates it from the training length.*

2.2 Assign trainees & send invites

- Open the approved training ■ ■ "Assign" ■ ■ pick trainees ■ ■ confirm
- ■ ■ The system emails each trainee a secure join link.

Only **assigned** trainees can join. The email link and the hall QR code lead to the **same** session.

2.3 Launch the Hall (optional)

- Approved Group training ■ ■ "Launch Hall"
-
- ■ creates the live session (if not already created)
- ■ copies the Join Code to your clipboard
- ■ opens 2 tabs: (1) Hall Screen (2) Live Dashboard

*You do **not** have to click Launch Hall for the session to start — the system auto-creates and auto-starts it at the scheduled time. Launch Hall is just the quick way to open the hall screen and the dashboard.*

2.4 Watch it live (Dashboard)

The **Live Dashboard** shows, in real time:

- Invited / Joined / Waiting / Present / Completed counts
- The question queue and who is speaking now
- The Q&A transcript
- Buttons: **Pause** · **Resume** · **Skip Speaker** · **End** (only if you ever need them)

2.5 After the session

Attendance and results are saved automatically and appear in the trainee reports (attendance %, time, questions asked, completion status).

3. Hall Operator Guide (the room with the big screen)

3.1 What you need

- **One big screen** (TV or projector) connected to a computer with **Google Chrome**.
- **Speakers** (the AI voice plays here).
- **Internet** (stable broadband; Wi-Fi for trainee phones).
- Trainees bring **their own phones**.

There is **no shared microphone** in the room. When the AI calls on a trainee, that trainee speaks into **their own phone**.

3.2 Steps

1. Open the Hall Screen link on the big-screen computer (Chrome).
2. Put it in full-screen.
3. Before start time, the screen shows: banner, title, QR code, countdown.
4. At the start time it goes live automatically.
5. ■ Tap "Tap to start the presentation" ONCE (this turns on sound).
6. Done – the AI now presents and advances slides on its own.

Step 5 is the only manual action. Web browsers block auto-sound until one tap. After that single tap, everything is automatic.

3.3 Recommended screen layout (live)

4. Trainee Guide (phone)

4.1 How to join

Option A: Open the EMAIL link
Option B: Scan the QR CODE shown on the hall screen

▼

Log in (your trainee account)

▼

Waiting Room ■■■ Countdown to start time

4.2 What happens during the session

```

Session starts ■■■ ■ your phone alerts you (sound + vibrate)
▼
Your phone shows the CURRENT SLIDE + topic + progress
(Watch & listen to the hall screen for the full experience)
■
Want to ask something?
▼
Tap ■ Raise Hand ■■■ you see your place in the queue
■
AI calls your name: "How can I help you, <name>?"
▼
The ■ Mic button turns ON ■■■ tap it and speak your question
■
The AI avatar answers out loud on the hall screen
▼
Training continues automatically

```

*The microphone stays **OFF** until the AI calls on you. You cannot turn it on yourself — the AI manages speaking turns so only one person talks at a time.*

4.3 When the training ends

You see a **"Session ended — thank you for attending"** screen. Your attendance is recorded automatically.

5. Full Session Flow (start to finish)

```

ADMIN sets schedule
▼
(System auto-creates the session before start time)
▼
BEFORE START ■ Hall: banner + QR + countdown ■ Trainees: waiting room + countdown
▼ ■ exact start time (automatic)
ATTENTION ALERT to all phones + Hall goes LIVE
▼
PRESENTING ■ AI avatar narrates slides, advances automatically
■
■■■ Trainee raises hand ■■ joins queue
▼
(at a Q&A moment)
Q&A ■ AI greets trainee by name ■■ trainee speaks ■■ AI answers (avatar) ■■ next in queue
■ (strictly one trainee at a time – no overlap)
▼
PRESENTING resumes ■■ continues to the last slide
▼ ■ end time reached (automatic) OR admin presses End
COMPLETED ■ attendance finalized ■■ reports generated
▼
Hall: "Session ended" ■ Trainees: "Thank you" ■ Admin: dashboard + reports

```

6. Quick FAQ

Question	Answer
Do we need a human trainer in the room?	No. The AI runs the whole session.
Does the session start on its own?	Yes — exactly at the scheduled Start Time.
Do we have to click anything on the hall screen?	Just one tap to enable sound when it goes live.
Can anyone join with the link?	No — only assigned trainees who log in.
Both email link and QR — same session?	Yes, they lead to the same session.
What if a trainee's phone disconnects?	It reconnects automatically and restores their place.
Can two people talk at once?	No — the AI grants the mic to one person at a time.
How is attendance counted?	Automatically: join time, active time, attendance %, completion.
What if we open the hall screen late?	No problem — it joins the live session already in progress.

7. Do's and Don'ts

Do

- Always set a **Start Time** when creating a Group training.
- Open the hall screen in **Chrome**, full-screen, with speakers on.
- Tap once to **enable sound** when the session goes live.
- Use **one** hall screen per room.

Don't

- Don't open the hall screen on **multiple** computers in the same room (you'll hear double audio).
- Don't expect sound before the **one tap** (browsers block auto-sound).
- Don't share the join link with non-assigned people — it won't let them in.

For any setup help, contact your platform administrator.
